

TECHNICAL RIDER

DJ C-Lioness is a solo act; she performs live music selection and mixing with samples and effects. She provides her DJ controller, controller stand, laptop, headphones, microphone, and all necessary cables to connect to the venue's PA system (preferred). If requested, she will provide and set up PA system/sound equipment for small to medium size venues for an additional fee outside of her DJ booking fee.

Additional notes:

- An area of at least 6ft x 4ft is required for setup.
- If venue provides PA system, DJ C-Lioness requires a monitor speaker positioned front stage right of the DJ space. If no monitor is available, DJ C-Lioness must be notified so she can provide her own.
- DJ C-Lioness's controller has XLR output connections (male) and she connects into the venue's mixer via 25-foot XLR cables with male ends. If mixer is located more than 25 feet away from DJ setup area or connecting requires different cables, DJ C-Lioness must be notified.
